

COCO

LOVING, DRAPING DONK, CURIOUS

"I am the latest born on the Sanctuary, and by far, the cutest of the Donks. And Momma Karen usually calls me 'Baby Girl'.

My parents, Honey and Waffle, will tell you that I am feisty, but I just like to keep things interesting. They will also tell you I am the jealous type because I usually do something to get attention when other Donks are being draped or otherwise loved on by Momma Karen and our guests.

But I am not jealous. It just annoys me because I don't like being left out! Maybe that's why Momma Karen sometimes calls me 'Nosy'.

In fact, when Momma Karen is Draping on Maple and Biscuit, I will sneak up behind her and push and nudge her from behind until she loves on me. And if she doesn't respond, I've been known to crouch down, crawl between her legs, stand up, and take off with her on my back!

Momma Karen then has to focus on hanging on so she doesn't fall off while I run around the Sanctuary with her on my back.

It always gets a great laugh out of Mr. Brooks!

In fact, I love to run; and, when I do Momma Karen tells everyone that I have 'the spins' because I look just like a black, ball of fur spinning out of control.

In addition to being the youngest, I am the most clever of the Donks, I am also the cutest and most loveable, and when Momma Karen calls me 'Baby Girl'. I love it.

Momma Karen and the guests often meditate with me. What they are pondering when they do this, I do not know. However, it is always great to share this quiet time with them as I am the focus of their attention. It is also very therapeutical for all of us.

Momma Karen is letting me work with Layla so I can be one of the Draping Donks Interactive Donks at the Sanctuary.

These sessions are even better than the meditation sessions. Momma Karen and the others will drape over and hug-on me for an extended period. In addition to sharing our warmth and energy, our vibrations often sync, and this process has significant healing powers for both the Draper and the Donk!

I especially like it when I get to do a therapy session with one of the children visiting the Sanctuary. They are sometimes scared, at first, but quickly realize that I am not going to harm them. And when they know that I love the therapy as much as they do they are always so nice and loving.

It is really nice to be able to help them.

Yours, in love ...

Coco
